

Dutch Surge Support Water

2021

Dutch water experts

Expert training

Fast response time

Short term deployment

What is DSS Water?

The Dutch Surge Support facility (DSS water) supports the operations of humanitarian organizations during and immediately after a disaster by deploying experienced water experts.

The deployment of DSS water experts contributes to saving lives and alleviating suffering of a vulnerable population that is affected by disasters.

This facility is financed by the Ministry of Foreign Affairs/DSH.
